<table>
<thead>
<tr>
<th>Pesticide Common Name</th>
<th>Pesticide Trade Name</th>
<th>EPA Registration Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dinotefuran</td>
<td>Alpine Dust</td>
<td>499-527</td>
</tr>
</tbody>
</table>

Locations of the pesticide application: Peace Garden and a sign at the front of the building

Reason for the pesticide application: Yellow jacket nests

The date and time the outdoor application took place:

DATE: 9/16/20    TIME: 6:20-6:35AM

Description of the problem and the factors that qualified the problem as an emergency that threatened the health or safety of a student or staff member: Stinging insects pose a threat to people, especially those that are allergic to their sting.

If applicable, description of steps to be taken to avoid emergency use of pesticides for this problem in the future: N/A

Description of the possible adverse effects of the pesticide(s) as per the Material Safety Data Sheets for the pesticide(s) to be used, if available:

**Acute toxicity:** Relatively nontoxic after single ingestion. Relatively nontoxic after short-term skin contact. Relatively nontoxic after short-term inhalation. **Irritation / corrosion:** May cause moderate but temporary irritation to the eyes. May cause slight irritation to the skin. **Sensitization:** Skin sensitizing effects were not observed in animal studies.

Pesticide product label instructions and precautions related to public safety:

**CAUTION:** Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

Note: as required by law, we are advising you of the following statement:
The Office of Pesticide Programs of the United States Environmental Protection Agency has stated: "Where possible, persons who potentially are sensitive, such as pregnant women, infants, and children, should avoid any unnecessary pesticide exposure."
