Review

- Across
- Alkaline _____ metals
 - combination of a metal with oxygen
 - bond between a metal and a non-metal
 - positive charge
 - most reactive non-metals
 - negative charge
 - The smallest unit of an element
 - group 2 period 3 element
 - location of protons and neutrons
 - something that shatters easily
 - element in group 3A with three energy levels
 - Group one elements
 - metals in groups 3-12

- Down
- An atom that has gained electrons
 - drawn into wire
 - combine with an atom of an element just like it
 - Noble gas with three energy levels
 - when in doubt, convert to
 - can be flattened into sheets
 - Smallest ratio of elements in a compound
 - bond between two non-metals
 - An atom that has lost electrons
 - number of electrons that make the element stable
 - An atom that has gained or lost electrons
 - element with atomic number 26
